Education

New York University

August 2025 – May 2027

Master of Science in Computer Science, **CGPA: 4.00/4.00**

Brooklyn, New York

National Institute of Technology, Calicut

July 2019 – May 2023

Bachelor of Technology in Computer Science and Engineering, **CGPA: 3.82/4.00**

Kerala, India

- **Secretary**, Computer Science & Engineering Association and The Literary & Debating Club. Lead Coordinator, FOSSMeet 2023.

Technical Skills

Languages: Python, Golang, Bash, C++/C

Administration: Enterprise GitHub, ELK Stack, Linux, GPFS

Technologies/Frameworks: Puppet, ReactJS, Flutter, Grafana, Prometheus, FastAPI, HashiCorp Vault, AWS (RDS, DynamoDB, EC2, Lambda, Lex, SQS, EKS, CloudFormation), Docker, Tableau

Experience

Decimal AI, Inc.

May 2026 – Present

Engineering Intern

San Mateo, California, United States

- Building AI agent infrastructure (retrieval, reasoning, execution) and backend APIs powering ticket analysis, code search, and traceable AI-generated responses over live customer knowledge bases, serving **12+ enterprises** processing **30K+** support tickets per month.

NYU IT: Enterprise Data Services Group

Jan 2026 – Present

Software Engineer Intern

New York City, United States

- Developing and maintaining NYU's Business Intelligence portal by resolving critical bugs and optimizing backend APIs.

D.E Shaw & Co., Site Reliability Engineering - Linux

July 2023 – July 2025

Senior Member, Tech (Jan 2025 – July 2025) — Member, Tech (July 2023 – Dec 2024)

Hyderabad, India

- Administered **6,000+ RHEL** servers with privileged root access. Executed releases across **300+ infrastructure servers** and independently led RHEL7 to RHEL8 migration for provisioning, SFTP, and utility servers.
- Managed a **900TB ELK** production cluster as one of five administrators. Collaborated on migration from SearchGuard to Elastic Security by developing scripts and implementing critical configuration changes. Improved cluster storage efficiency by **12%** through **GPFS** snapshotting and automated offline snapshot workflows.
- Spearheaded **GitHub Enterprise Server** operations as one of three global administrators, supporting **1,600+ repositories** and **2,000+ users**. Deployed infrastructure for Dependabot and GitHub Actions runners.

D.E Shaw & Co.

May 2022 – July 2022

Systems Engineering Intern

Hyderabad, India

- Designed and developed a **Certificate Manager** to manage the lifecycle of X.509 certificates for the firm's internal websites and services. Reduced operational toil of SRE engineers in the firm by approximately **35 hours** each month.

Publications

Proof-of-Variable-Authority: A Blockchain Consensus Mechanism for Securing IoT Networks | [LNCS, Springer](#)

- Designed a **custom blockchain consensus mechanism** with a robust **PKI system** to secure IoT networks, enabling seamless **device authentication** through device certificates; built an end-to-end **PoC**.

Select Projects

Zone | [FastAPI](#), [React](#), [Gemini](#)

Dec 2025

- Owned end-to-end delivery of an AI-powered scheduler using Gemini Flash 2.5 to translate natural-language tasks into optimized Google Calendar time blocks for the **ODSC AI Hackathon**. Defined APIs, architecture, and prompt workflows across frontend and backend.

VulCAN | [JavaScript](#), [AWS Fargate](#), [SQS](#), [SES](#), [S3](#), [RDS](#), [Flask](#), [Semgrep](#)

Oct 2025

- Built a scalable, asynchronous **vulnerability scanning platform** for on-demand analysis of GitHub repositories; integrated Semgrep for detection, classification, and historical tracking, with **contextual AI suggestions** and recommended fixes for detected snippets.

swimiNIT | [Flutter](#)

Apr 2022

- Developed a mobile app to manage NITC's swimming pool users and employees following **SDLC principles**; authored feasibility, SRS, design, and test documentation.
